Valuation for Sustainability & Inclusive Growth: Bridging Finance & the Digital Divide

In an era marked by rapid digital transformation and growing climate concerns, the stability and growth of our global economy hinge on innovative approaches. The V20 Summit offers a unique platform for Valuation Professionals worldwide converge and exchange ideas on navigating these challenges.

Our theme, "Valuation for Sustainability & Inclusive Growth: Bridging Finance & the Digital Divide," underscores the critical role of valuation in achieving a balanced and equitable global development. As businesses increasingly adopt sustainability practices and ESG principles, robust valuation methodologies must evolve to reflect these new priorities.

The V20-Brazil will serve as a global Platform for valuation professionals, academics, policymakers, & industry leaders to discuss & explore innovative valuation practices that support sustainability & inclusive growth. The conference aims to provide a collaborative environment to address the challenges & opportunities within the valuation industry.

The **V20** invites **academic research papers, case studies, and presentations** on industry and academic trends/practices/initiatives related to dealing with the challenges of today and shaping the valuation profession for the future.

SUMMIT THEMES FOR THE VALUATION OF LAND AND BUILDING, PLANT AND MACHINERY, AND SECURITIES OR FINANCIAL ASSETS:

- The Role of International & Local Valuation Standards in Influencing Valuation Practice in Emerging & Establishing Markets.
- Cost of Capital & Country Risk in Transnational Assessments.
- Importance of the Qualification & training of Evaluators (Accreditation of the Assessors & Standardisation).
- Mass Assessment for Taxation Purposes.
- Social interest Valuations.
- ESG in Valuation.
- Reliability & Data Acquisitions in Global Assessments (Data transparency & code of Conduct).
